Innovation

Activity Tracking

- ★ Allows you to track player activity in Roblox games. Each workspace can set-up their tracking module to see in-game chat messages, playing time, idle time and even the time users spend typing.

Remote Game Management

- ★ Manage game moderation, real time chat logs and game information directly from ReAdmin.

Sessions Management

- ★ Manage and track sessions by time, server and session role. Create schedules for shifts, trainings or even meetings.

Punishments

- ★ Manage and track disciplinary actions like warnings, kick, ban, suspensions or even group terminations.

Forms Management

- ★ Manage and collect responses for forms like job applications on the web.

Tasks Management

- ★ Create and assign tasks to users in your group with deadlines and checklists.

Inactivity Logging

- ★ Create and track user inactivity logs for time spent away.

Activity Tracking

Activity Tracking

- ★ Users can view their total minutes spent in game, minutes spent actively playing, minutes being idle or even how long they spent typing.
- ★ Users can view the total number of messages and sessions they have attended for your group's record.
- ★ Activity goals (quotas) are also seen on this page.
